Woods Hole, Massachusetts

Dear Josh:

When I was in Madison a few weeks ago I learned that you developed a new approach for getting protoplasts. Unfortunately you were out of town, and I got the details second-hand. Could you possibly drop me a line, giving me the nature of the medium and sucrose concentration you are using. Needless to say I shall not use this material without giving appropriate credit.

We are finally getting around to your "paralyzed" strains.

I hope you are enjoying your summer.

Best regards *to both of you.*

Henry
Henry Koffler
Professor of Bacteriology
